|                    | Cattle easily handled individually and in mob, handler in control at all times. A proportion of cows were reluctant to stand still on scales in crush, tail flicking and repeatedly pushing on rear and front door. Cows exited the crush briskly, however settled when back in mob.                                                                                                         |
