	Heifers worked well through yards and crush. Did move freely through yards but easily steadied up and blocked. Heifers walked down the race and into crush very well but some did became agitated when caught in the head bale. (Described as Slightly Stirry)

Assessor Comments	A good line of Angus Heifers - 1 Brand. Acc Breeder. Visually appear to be younger heifers out of draft of 283 head, offered by the vendor and younger age due to some being heifers first calves, which calve later than cows. True to type Angus Heifer that still have potential to grow out into good cows. Lighter in condition than main lots. Heifers had a very dry start in 2023 until Nov/Dec rain. Experienced another set back with 190mm rain overnight in February 2024. Heifers doing well again now. 2 Bulls got in with heifers (date unknown) but think about Nov 2023 and removed 15/12/2023. Heifers injected with Ovuprost 29/01/2024. Heifers only in store condition and potential for good compensatory weight gain will suit to as backgrounders for feedlots or keep to join to bull of your choice.
