Vendor Comments

These are just a normal annual turnoff of steers that have done very well over the past few months.

Temperament

Yards

Crush

Paddock

	Quiet: 48 head	Quiet: 45 head Slightly Stirry: 3 head	Temperament not assessed in Paddock
	Steers were very quiet to handle in the yards and on the scales. Most steers did react a bit to being caught in the head bale whilst being tagged with their NLIS device. This behavior is not unusual. Only three steers that could be described as slightly stirry in the crush but quiet out with their mates in the bigger yards. Temperament is not an issue here.

Notable Traits	Traits 4 Head Light warts on head/neck. 1 Head Twisted tail		
Assessor Comments	Buyers, a two deck load of steers best described as Composites due to the mix of breeds involved in the vendor's breeding program, both cows and bulls (see stock history comments and photos/video). They mainly show British bred traits. They present in basically store to forward store condition with a few that have a little bit more cover on them. The steers show good carcass traits with length and frame built in and I would imagine these will suit most export feedlots for direct entry straight away. Steers are extremely quiet so should adapt to a feedlot environment reasonably quickly. The steers noted with wart is described as only light. There was one steer with warts near the eye (would be the worst steer affected) has a photo attached for an indication. Please note that delivery is required no later than Monday 18th March.
