Notable Traits

Traits

1 Head Old Blight Scar

Assessor Comments

Smaller line of vendor bred Angus weaner steers that are keenly sought by repeat buyers. Steers weighed 200kg to 249kg to average 225kg following a 18 hour dry curfew. These weaners were good to handle during assessment and drafting, normally worked with dogs from a vehicle and will now remain in the yards and adjoining holding paddock up until delivery, for weaning and further handling. Brother lines in the same sale. No allowance has been made for weight loss during weaning - make your own assessment. Calves will be fed on Oaten and Vetch hay.
