Assessor Comments	Here is a tight draft of good quality young heifers to take on as future breeders or to feed. Heifers averaged 248kg at assessment. These heifers are normally retained as future breeders but given the current dry time they cannot be retained. Heifers were good to handle in the yards and in the paddock. Heifers are Tivoli, Pine Creek & Hazeldean blood lines and are out of medium to large frame cows. Cattle have been recently drenched with Flukazole and are powering ahead. intending buyers please note that a handful of cattle have old pink eye scaring in one eye that is not deemed detrimental.
