Quiet good to handle and draft, sauntered up race and into weight box, odd one jumped around a little but generally not to bad. A couple of heifers burrowed under the heifer in front going up the race to the weight box.

Handled With	Bikes , On foot , Vehicles
Assessor Comments	The pregnancy tested empty portion of the herd replacement EU Accredited heifers that are 16 to 17 months of age. An extensive range of Poll Hereford genetics have been used from AI through to Warra Yadin blood bulls (details available on request). Weatherly Angus bulls used. Would be an asset to any herd as replacement breeders or suitable to a feedlotter or could be finished for a kill jobs . Noted doing cattle that have always performed well for previous buyers on grass and grain. Two heifers observed with a cloudy eye, but not detrimental.
