Assessor Comments	A very good quality line of Unjoined Lawson Angus blood, March/ April '23 drop Angus weaner heifers from very well regarded Western Districts herd. These heifers have exceptional growth for age weighing an average of 402kg full (349-469kg). Note: Vendor has scanned Heifers for Reproductive Soundness for Purchasers confidence. (See Certificate) A small tail was removed from the line. Odd animal with small amount of Ringworm that has been treated & is clearing up. Top Quality heifers that would be ideal to join this autumn, highly suited to an F1 or in a self replacing Angus program. This herd has an excellent reputation for Marbling with the steer progeny highly sort after by backgrounders & feedlots and will not dissappoint.
