Calves carry an excellent temperament and is a credit to their breeding. To continue, these calves would be best suited

Handled With	going through a full weaner process to ensure this continues. Bikes , Dogs
Assessor Comments	Very well bred line of unweaned heifers which carry plenty of breeding behind them. Complete drop on offer. Calves are still running on their mothers and are developing nicely on very minimal feed. Steers would greatly benefit from the weaning process and a higher plane of nutrition. Alot of compensatory gain to be had on these calves with quality feed in front of them. They are bred from large frame productive females which are also on offer in the eastern states sale. Approx 5% of calves carried small old pink eye scarring deemed not detrimental. Calves will be fully checked at delivery and anything not deemed right will not be delivered. Steer portion also on offer. 10 calves based on weight/type were removed at assessment.
