	Weaners were a pleasure to handle. Odd weaner had a bit of run in the yards - typical of freshly weaned calves. Surprisingly well settled over the scales. All settled after assessment and content with human interaction - refer video. With continued and correct handling these weaners can be quiet to docile in assessors opinion.

Assessor Comments	Complete drop of vendor bred 2023 drop Angus heifers off “Glenayre”. They are out of large framed Tulagi blood Angus dams (700-1000kg when mature and fat) sired by Talooby blood Angus bulls. With a curfew weight of 273 kg at 6.5-8.5 months of age these heifers have not had a set back. They will mature into heavy weights as mature cows if required and are suitable for a range of markets. They have been yard weaned on the 27/03/23 and will be released after assessment onto cereal hay in a paddock. 100% grass fed and antibiotic free. Top quality young Angus heifers that will continue to perform given feed. Ideal to background on crop for future feedlot or breeding programs. Please note vendor is also offering 21 steers in todays sale. Feedback received from previous purchasers was weaners performed well. 2 head with active pink eye treated at assessment. If in my opinion they have not improved by delivery they will not be delivered. Should you require any further information please call.
