Vendor Comments: Very happy with how the heifers are presented. Were going to retain and calve down but absent during calving time period. Heifers have been on the front foot from the start and would be a great addition to any herd.

	Very quiet cattle to handle. Cattle are well educated in the yards and ran seamlessly through the weighing in and preg testing process.

Assessor Comments	An excellent offering of 14 PTIC Angus Heifers AC/Breeder. Heifers carry Talooby blood on the dam and sire side, and are back in calf to Talooby Angus sires. Heifers are in forward store condition and have been, and will continue to be, on improved pastures. Heifers are approximately 10-16 weeks in calf. Cattle displayed great education throughout the yards and were a pleasure to handle. Heifers were going to be retained but only selling due to being unavailable during the calving phase. Would fit in well with any established herd or someone just starting out. Please note: 1hd with warts on head
