Assessor Comments	Outstanding line of young PTIC Rennylea Angus cows in calf to very good quality Rennylea Bulls (links attached). The Skinners are very passionate Angus breeders and have been using AI throughout the herd for the past 7 years to turbo charge genetic gain. Selection pressure is placed on every female with a hard-line approach to culling on visual, structural soundness, temperament as well as genomics (through heifer select) in the last 3 years - genomic data available on the S-drop cows at buyer request. Only being sold due to having sufficient numbers and very high conception rates - with the majority of these calving in the last cycle of the joining period. Classed in breeders that would make a great addition to any herd or for someone looking for an entry into breeding. Please note; one cow with a lump under her jaw (see photo) which isn't causing her any issues. Vendor also has 12 dry heifers/ cows in this sale.
