Assessor Comments	A B-Double load of good quality, PTIC Angus cows. Clea Angus born and bred but were sold as heifers to Mt Falcon Station (Tooma) but purchased back as PTIC cows when the drought broke on the Monaro. Cows are joined to high quality Clea Angus bulls to calve mid-August for 6 weeks. These cows have a big reputation for production, with Clea classing heavily each year on fertility and structure. Calves from these cows are purchased by Rangers Valley Feedlot year in year out. High quality herd that would be an ideal opportunity to secure some good genetics. Could also be purchased as an option to calve and trade. PLease note: Clea Angus PTE heifers in same sale. Cows were checked for any structure issues and were removed at assessment.
