Comment on Fat Score 1 Cattle: These steers present in strong store/forward store condition & will travel anywhere following correct travel guidelines. Steers since weaning have been put in a natural native pasture paddock which has been heavily affected by dry climate. Steers present fresh in the coat & are looking to excel given the correct nutrition.

Vendor Comments	An outstanding line of Spring drop Angus steers that have the bloodlines & genetics which usually are carried through to feeders or bullocks. Only due to seasonal conditions are being sold. "We spare no expenses in getting the premium genetics."

Temperament

Quality Grades		Store Condition	
Very Good	100%	Store	100%

Yards	Crush	Paddock
Quiet: 20 head	Quiet: 20 head	Temperament not assessed in Paddock

Steers were a pleasure to handle right throughout the weighing, drafting & photo/video process. The Obst family pride themselves on offering quiet cattle as they spend lots of time & effort in assuring a quiet herd. Every day of weaning they would use dogs & walk through cattle in yards to educate quiet temperament as if anything looks side ways will be sold in saleyards.

Handled With	Bikes , Horses , On foot , Vehicles
Assessor Comments	An Outstanding genuine line of QUIET, VENDOR BRED, ONE MARK , AUG/NOV drop 23, properly WEANED/VACCINATED Angus steers presenting in strong store/forward store condition. Gydgenboyne Angus program has always been heavily sought after by numerous feedlots & sale yards as they have the renown Angus genetics (TE MANIA EMPORER, RENNYLEA, EMULATION NEXT & MILLAH MURRAH KLOONEY). Its very RARE to see the Gydgeboyne weaner steers hit the open market for opportunity restockers until NOW due to the on going dry conditions. Steers weight range was from 251-328kg which represents top 30% of the drop. Note: 2 steers had a slight pink eye problem deemed active in one eye which was treated at assessment. The same vendor will have 2nd draft in the same sale. BUY WITH UTMOST CONFIDENCE as these steers have been spared no expenses genetically.
