Temperament

Yards	Crush	Paddock
Quiet: 11 head	Quiet: 11 head	Temperament not assessed in Paddock

These cattle are typically very quiet to handle, as seen by the vendor being 92 years old and still able to work them on his own. By the end of the assessment process some cows were a little agitated but settled very quickly.

Handled With	Bikes , Vehicles
Assessor Comments	A very good line of classed in PTIC cows on their6th and 7th calf only being offered due to the whole herd being dispersed. These cows are the oldest age group offered today. Of the 11 head three had lost their management tag thus age unknown however are most likely younger. Crush setup wasn't great for mouthing so only mouthed one of the oldest cows and was a very solid sound mouth, cows are off softer type country and wouldn't have any issues going around for many years to come. Cows are of very good medium to large frame that always produce quality calves sold in the local weaner sales. They present in forward store to prime condition having just had big 300kg+ calves taken off last month. Joined back to a Bongongo Angus bull to commence calving approx. 16th July these cows would be a welcome edition to any herd or a terrific start up. Highly recommended.
