Handled With	Cannot recall any heifers showing much stirriness. The Winnidad cattle are generally very good to handle. Most heifers filed through race quietly. Photographing and videoing was no issue. Bikes , On foot , Vehicles
Assessor Comments	A nice quality draft of Angus heifers presenting in forward store to forward condition. They have received their 7-in-1 booster vaccination and are sired by Chiltern Park & Weeran Angus bulls, bred from a herd of Banquet, Barwidgee & Weeran blood cows, the Winnidad operation selects genetics on structure, fertility traits, above average growth, above 2.0 for IMF and positive fat. The majority of the offering (60%) have not seen the bull, with the balance (approx 40%) having been PTE. Please note, some ringworm has appeared since assessment, with a paddock inspection suggesting approx 20-30% affected with patches around eyes or body. Heifers appear very healthy otherwise. Noted performance cattle that have performed for previous purchasers. Presents a terrific opportunity to acquire very well bred, Angus heifers ready to join as future breeders or background and finish to trade or export markets.
