| Assessor Comments  | A very nice line of PTIC vendor bred heifers due to calve early June through to early August. From an outstanding Ardrossan based herd and in recent years have been using leading industry sires through an AI program. These heifers will grow into medium-large framed fertile matrons. Heifers are in calf to sons of Musgrave mediator and Baldrige command (these same bulls have been used over heifers the past couple of years with little to no problems calving). One heifer noticed with a white udder. |                                                                                                        |  |
