Assessor Comments

A good line of PTIC mixed aged Angus cows. These cows have produced a calf every year for the Anderson family and are being sold to reduce breeder numbers. The cows are good medium frames and show good type. The Andersons have been using top quality Reiland genetics for many years and they are joined to Reiland and Ardrossan Angus bulls to calve in the spring for 8 weeks. These cows would be an ideal trade opportuniyty for the purchaser. Note: A yellow tag which is the oldest cow was mouthed. (see photo)
