Vendor Comments	Buy with confidence these heifers are for sale through no fault of their own, we have to make room for more weaners coming through & would traditionally keep them through to feeder or processor weights.

	The heifers were easy to handle in the back yards with the odd heifer slightly agitated. When moving in the race and pressure gained some heifers become agitated but when returned to mob seemed to settle. With more handling the heifers would become easy to work with.

	3 Head Skin lesion					
	1 Head Slight blue eye					
Assessor Comments	Buyers a line of vendor bred predominantly Droughtmaster infused heifers bred on light forest country, trucked to the Central to be weaned & put on better pastures. These heifers weaned since mid March present in mostly foward store condition & are over their weaning which means they are really starting to hit their straps. Given the opportunity these heifers will continue to power ahead & given there is lesser percentage with a defined hump should grow out to meet most feeder or slaughter markets.
