	Overall these females were good to handle. A couple of females were unsettled when pressure was applied in the yards but once taken off they settled down. Cattle handled well through the race/crush and on the scales. These females have been educated to move when pressure is applied but also settle when the pressure is off.

Assessor Comments	Quality line of 2.9 to 5.9 years old PTIC Angus females. Females are PTIC for a tight 3 week calving to commence mid-September 2024. Joined to industry leading Milwillah & Hardhat Angus sires. These fertile & productive breeders had weaners taken off a couple of months ago and have done an excellent job raising their calves. These cattle on offer have 30 plus years of Angus breeding running through their blood, with the vendor selecting high indexing sires from Bongongo, Milwillah & Hardhat Angus studs, with a focus on 400d/600d Growth, Positive fats, Milk, Temperament & Fertility. Females on offer are classed in breeders, only being offered to the market due to later calving not suiting the vendor's program. This is a not to be missed opportunity to purchase quality Angus genetics.
