Assessor Comments	A great opportunity to secure a Neat even line of well bred Angus heifers that are one mark and Vendor bred. This line of heifers are PTIC to a LBW Bald Blair Angus bull that were joined over an 10 week period to start calving from late August. Heifers are well bred from a quality angus cow herd that carry Speriby North, Bald Blair and Glenavon Angus bloodlines, Heifers them selves were sired by high IMF indexing bulls Including Bald Blair NBBN311, Speriby North NXOM691 and NXOM141. Heifers came through a very tough Winter and Spring, However they overcame this by having Exceptional joining rates showing great fertility. Heifers are really bouncing away on the back of flush of recent feed and still have plenty of growing left given a continued rising plane of nutrition. A great commercial article on offer that will be priced to sell, only due to being surplus to needs as a change in direction. Quite easy to handle heifers, not to be missed.
