Vendor Comments

We have been using Rennylea Angus bulls exclusively for over 20 years. These heifers were originally classed in to be retained in the herd but due to a tight season all heifers naturally joined are now surplus to requirements.

Joining Details

Station Mated bulls put in: 24/10/2023 bulls taken out: 05/12/2023 (43 days)

Bull Breed(s): Angus

To the vendors best knowledge, this lot has had no access to bulls or stags aside from stated joining period.

	Heifers were very good to handle in the yards & crush.		
Handled With	Bikes , Vehicles		
Notable Traits	Traits		
	4 Head Cloudy Eye/Pink Eye Scarring		
	1 Head White markings in front of flanks		
Assessor Comments	PTIC Rennylea Angus blood heifers, they are 21-22 months of age, scanned in calf to Rennylea Angus bulls from 6-7 months in calf. These heifers were scanned into the second joining cycle back in January and were retested 17/5/24 prior to assessment to guarantee pregnancy status. These heifers were classed in to be retained within the herd, due to the dry season all naturally mated heifers are now surplus to requirement. They were joined to high indexing Rennylea Angus sires, with the Hearn family targeting bulls with high 400 day growth, high IMF, calving ease, and must have near perfect structure. These heifers will develop into medium/large framed matrons. Opportunities to acquire heifers of this quality don't come around everyday, and will not disappoint. Vendor is also offering 31 heifers PTIC in the first cycle.
