Assessor Comments	A great line of Black F1 2nd Calvers bred from top 10% of Index AI Wirruna Sires, joined up to LBW Rennylea Angus bulls. These cattle were very quiet to handle and would grow into great cows, with all the traits of the Friesan, with the added hydbrid vigor. Outstanding Angus1st calves weaned in January. Cows are in strong strore condition, having put everything into their calves. Based on vet scanning cows will principally calve from the end off June for 12 weeks. Even run of 100
