Assessor Comments	A very tidy line of well bred rising 2 year old angus females that are a good moderate frame with depth and capacity. The strength of breeding is evident in these cattle which is reflected in their softness and overall shape. In ideal condition to take forward for calving with all females visually showing signs of being in calf with depth of flank and just beginning to soften down. A quality line of future matrons that would fit into any discerning cattleperson's herd who's selection criteria is trueness of type and genetic performance.
