Vendor Bred

Stock History

Lifetime Traceable

Bloodlines

Yes

These steers have been bred and weaned on property. The steers are out of Ultrablack and Georgina Gold Composite cows. A portion do have some Wagyu content in them from the cows.

100% of cattle in this lot are Lifetime Traceable

Steers are by Palgrove and Nindooibah Ultrablack bulls.

Grazing Conditions

These steers have been grazing on good Mitchell and Buffel downs that has enjoyed a massive season. Grass is considered fattening feed with still plenty of green shoot in it.

Returned same

Burr/Seed in Coat

Noogoora burr noted in some tail brushes.

HGP Status

Chemical Residue

J-BAS Score

The owner declares that the cattle have not been treated with HGP at any period of their lives

Clear - No known history.

Vendor Comments

A good run of ORGANIC Ultrablack cross steers that are showing plenty of frame and no excessive condition. These should really bounce ahead on either crop, grass or on feed.

|                    | expertly handled with very good stockmanship the steers flowed through the race and crush well. A very small number were aggressive or agitated when confined or isolated yet settled well when returned to the mob. Cattle were turned out directly after assessment with horses and bikes and left the yard quietly.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Assessor Comments  | Buyers a good to very good quality line of ORGANIC USDA, NOP and GAP certified steers that will suit all export feeder and/or organic programs. Steers are progeny of cows purchased Georgina Gold and Ultrablack programs and are noted performers on either crop or on grain. These steers presented in mainly store to forward store condition so as a result I would expect plenty of compensatory gain given the right feed conditions. Buyers be aware the photos and videos are representative of both the heavy line and light line of black steers due to yard space. The heavy line has been bang tailed with the light steers left as long tails. Also noted the odd steer with a small amount of fly rub on the neck and a couple of steers with old blue eye scarring but no sight issues here. Note there are numerous lots from Terrick in this sale, all 1 brand. |
