Assessor Comments	Gilliland Livestock Marketing offers a lovely line of 24 Droughtmaster heifers. This run of heifers present in store condition after being weaned and grazed on very light sandy forest country at Tamborine. With a large frame these heifers were weighed to average 230 kg at assessment. As can be seen in the videos and photos these heifers are predominantly softer Droughtmaster heifers with a small percentage showing a little higher indicus content. Overall, a very even line of store heifers that will excel in a very short time frame if given the opportunity on better feed conditions.
