Comment on Fat Score 1 Cattle	Most are score 1's and are fit to travel any distances without any problems.
Vendor Bred	Yes
Stock History	Bred out of a good quality herd of Red Angus females.
Lifetime Traceable	100% of cattle in this lot are Lifetime Traceable
Bloodlines	All by registered Red Angus bulls purchased ex: Anama (SA). The genetic gain from introduction of these sires is really starting to be noticed.
Grazing Conditions	Bred in traprock country and currently have access to a good body of summer grasses that still has plenty of green in it from a very good summer season. Still in the weaning process and being fed good quality hay in the yards. Returned to: Will remain in yards and/or holding paddock on hay until delivery.
Burr/Seed in Coat	Noogoora burr on the head, in the coat and tail brush on most steers.
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives
Health Treatments	Vaccinated 03/02/2023 5 in 1 (branding) First Dose
Chemical Residue	Clear - No known history
Eligibilities	Russian Eligible Saudi Eligible PCAS Eligible
J-BAS Score	6
Vendor Comments	The annual turnoff of excess weaner heifers. The season was fairly tight in the later half of 2023 as as such are lighter than

last year. There are possibly 5-6 that look to have struggled slightly but that could be a result of being a heifers calf.

Joining Details	Not Station Mated
Any Access To Bulls or Stags?	Yes, last access to bulls/stags: 22/05/2024
Joining Access Details	Exposed to bulls as followers on the cows up until weaning. Highly unlikely these would be cycling due to weight and age.

Temperament

Yards	Crush	Paddock
Quiet: 129 head	Quiet: 120 head Slightly Stirry: 9 head	Temperament not assessed in Paddock

These quieten down very well since weaning commenced with all the bellowing for the cows pretty much gone. Most handled very easily at assessment through the crush & in the race however there were the odd few that were a bit keen in the race. They had never been through the race prior to assessment, and they behaved like they had been up there numerous times. Very quiet out in the bigger yards when being photographed and videoed. They do respond well to bikes and dogs in the paddock.

Handled With: Bikes , Dogs

Notable Traits

	Traits
5 Head	Blue dot in eye (1 eye)
2 Head	Blue eye dot in (both eyes)
1 Head	Light wart on head

Assessor Comments: Buyers, a line of Red Angus heifers PCAS ELIGIBLE that are surplus to further breeding requirements. These will suit restockers to grow out and background for domestic feeder markets. The hard work of breeding and weaning them has been done. Heifers very clean in the muzzle with no nasal discharge that is sometimes prevalent in weaners at this time of year indicating good health. These bred on lighter country, history would suggest they will really hit their straps if they are exposed to crop or winter herbage on heavier improved country. These a little lighter than last year but the season was tight when they were calved but show limited negative sign of growth as a result, maybe only 5-6 head a bit drier. It is probably human nature when selecting the replacement breeders to pick the more growthy heavier heifers as they are generally easier on the eye, however it must be noted some of these are probably just the younger end or out of a first calf heifer but still genetically sound.

Assessor: **Bob Jakins (Level 1 Accredited)** Phone: 0419 788 366

Delivery Period	03/06/2024 to 04/06/2024 (2 days)
Delivery Point	"Warroo" yards located 42kms S/E of Inglewood or 70kms west of Stanthorpe. Lat: -28.5404817257707 "S Lng151.349199260629 " E
