Assessor Comments	A good line of young heifers that will either suit a feeding program, grassfed option or make excellent mothers and addition to your herd. The long term breeding history in the females is a real attribute and has been compliments by the Long Valley Black Simmental Angus hybrid. The heifer are showing sound structure, plenty of length, early signs of carcass expression. Heifers from the herd have proven themselves in the past with repeat buyers either giving them opportunity in a feeding situation or taking them on as breeders. This group of heifers will benefit from hybrid vigour with emphasis on an expression of maternal traits. ** Please note bull was found in the mob at assessment and removed.
