Handled well in yards, not a single heifer got agitated in crush. Did jog for maybe 20-30 metres when let out of yard otherwise dropped back to a walk and are quiet to move around in the paddock.

Handled With	Bikes , Dogs
Assessor Comments	These heifers are some of a larger lot I purchased as station mated/blue tags earlier in the year and are now PT well in calf. At testing date they were 18-20 weeks to 28-30 weeks in calf so now they would nearly all be in last trimester and expected to drop over a 10 week period starting end of June early July. Couple of heifers showing signs of softening up. Purchased being joined to Booroomooka blood bulls and have had other heifers out of this line already calve unassisted. Good quality heifers that would blend in with an already established herd or make very handy starter herd.
