Assessor Comments	The vendors are moving away from a cow calf breeding program after many years in this system. These cows have been a pleasure to have since weaners and have grown into great cows. They have always produced a calf and have always calved unassisted. Last years calves were only taken off these cows 2 weeks ago and its a credit to them how well they have held their condition thru a tough enough summer and autumn, the calves have weaned off at 330kgs, with the cows back in calf to the same sire as those calves. Please note vendor also has 8 Angus cows in the same sale with the same credentials to make a line of 20.
