|                    | Heifers flowed well through the assessment process. They walked calmly between pens. A few heifers were agitated while in the crush being mouthed but calmed once through the draft back in the mob.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |      |                         |                             |

| Assessor Comments  | 37 PTIC Angus Heifers. These heifers are predominately vendor bred, one mark and Te mania Blood. These females are medium to mostly large frame and are sitting in ideal condition to calve down. Heifers are to be sold in two lots of 37 as a run out the gate (74 head in total). They are joined to LBW Te Mania and Rennylea blood bulls to commence calving in late June for 9 weeks. Bulls are selected with focus on strong maternal traits and top carcass attributes for IMF & 400DW. Heifers were preg tested back in February and have been retested on the 21st of May confirming they are all 6 months plus in calf. Please note the vendor has another 20 PTIC heifers with an identical joining offered in the same sale providing the opportunity to put together an exceptional line of 94 females with all their lives ahead of them. |      |                         |                             |
