| Assessor Comments | Angus X Angus hefiers PTIC to a Charolais and Angus bull. 5 head currently have calves at foot that will be weaned off at delivery. They are lighter in condition due to feeding a calf and will respond quickly to a change in diet. They have been joined from the 26-11/30/03 - 2 hd later calving bang tailed. These heifers were quiet at purchasing and with regular human and horse interaction temperament is not an issue. They were PTIC on the 03/04 and given a 7 in 1 then again on the 25/05 to ensure they are pregnant. The dry heifers (2head) were removed and sold following preg testing. A line of medium to larger framed future breeders with their whole lives ahead of them. Ideal to start a herd, add to an existing base or for a trade to calve down and sell with a calf at foot in the spring. Heifers will be realistically reserved. Vendor is offering another 18 PTIC heifers in today's sale. |
