	Good cattle to handle through yards, a few agitated in the crush & odd cow had a bit of run in the yards after weighing. They are well educated to dogs & electric fences being regularly being moved through cell grazing system.

Assessor Comments	These are a magnificent line of Team Te Mania, EU Accredited, Q drop (2019) PTIC cows. These are big volume, large frame cows bred to produce feeder steers for the high end long fed makets. All in calf to Team Te Mania Bulls with average IMF of 4.53 (ave top 10% of the breed and nearly twice the breed average) & 128 for 600-day growth (top 30% of the breed) - see attached joining sire links. The Boona herd focuses trait selection on fertility, ease of calving, growth & marbling. The herd has won CAAB supplier of the year award, and the steer progeny perform in the top 5% of Rangers Valley Feedlot suppliers. They would be a great addition to any herd & come with our highest recommendation.
