Notable Traits	Traits 80 Head These ewes are culled from the stud flock for excess hoof growth, good well bred shedders			
Assessor Comments	A very well bred line of Aussie White Shedders showing good size condition and shedding traits. Have 19 lms at foot with the ewes to continue lambing over the next few months. Ewes aren't scanned in lamb but had rams with them until a month ago. Mostly 2 and 3 year old ewes that have been culled from the stud for excess hoof growth, would be ideal for a terminal operation and may well have no foot issues in a dryer harder environment where the feet would get some natural wear walking on harder ground. Never been footbathed and no sign of scald. At delivery care will be taken with any newborn lambs or ewes that appear close to lambing.
