Assessor Comments	A great line of SIL maiden Dohne ewes that will add fertility and positive growth traits to your flock for years to come. These young ewes scanned up exceptionally well at 150% and they are in ideal body score condition to successfully lamb down a large percentage of lambs given the correct management and feed. These ewes have a tight 25 day joining period which gives the purchaser the flexibility to move ewes and lambs through better feed paddocks sooner in a tight feed season. These lambs were sired by stud Glen Holme Dohne rams offering the buyer the flexibility of having restocker ewe lambs to select from or target the terminal lamb market. These ewes are Gudair vaccinated and have been extremely well received by buyers in the past. These ewes are not marked for multiples but can be identified by eID tags if the purchaser would like it done. Ewes are within a month off lambing, need to consider this for trucking distance and curfew.
