	To start the heifers were uneasy in the yards wanting to move away from the assessor but settled nicely to stand around after a short period of time, no malice shown, great cattle to work through the race and crush at preg testing and assessment, feeding themselves through with very little encouragement.

Assessor Comments	31 Vendor Bred, Good Quality Angus heifers not carrying any excess condition following complications with our vendors health and a lack of good feed. Heifers have fended for themselves all their lives, now running on light timbered / regrowth country, they will respond well to improved nutrition. Heifers are all Speriby North bloodlines. All mouthed with 17 heifers with 2 teeth and 14 with 3 or 4 teeth. Heifers weighed 300kg to 438kg to average 351.5kg full with an estimated delivery weight of 334kg. Heifers had a 5 in 1 at branding and booster 6 weeks later. Good line of 1 brand quality Angus Heifers with years of breeding and great bloodlines behind them and a known doing ability.
