	Cattle were a pleasure to handle as can be seen from the video There was an odd steer that took a while to settle whilst on the scales but went through the crush without issue.							
Handled With	Bikes , On foot , Vehicles							
Assessor Comments	These steers are the top line of 75 out of a line of 180. As can be seen from the photos and videos they are very well bred and quiet to handle. These steers are normally carried through the winter and sold as feeder steers or finished into domestic and export markets, however they have had to be offered due to the loss of a long time lease block. These grass fed steers come highly recommended from previous purchasers including Greenhams who have purchased them to finish into their Cape Grim premium product range.
