Vendor Comments	Annual run of steer calves. They have done well and I'm very happy with their weight for age and their growth.

Calves handled well considering they had just been drafted off their dams and the cows were standing outside the yards bellowing. They blocked reasonably well when drafting, and proceeded through the race and crush with relative calmness. When heavy pressure was applied they got agitated, but nothing more than I would have expected considering the situation at assessment.

Assessor Comments A small line of genuine Angus weaners. Showing good weight for age. We drafted these 7 off as they are a fraction younger than their older brothers. The older brothers will also be for sale in this same auction (13 head). One steer in this mob had a retained testicle at marking, we successfully removed this at assessment, he is now cleanly castrated. He shows some thickness as visible in the video. He can be taken at the purchase price or left out at the buyers discretion.
