Assessor Comments	36 Watervalley Black Angus heifers PTIC 5-8 months to Watervalley Black Angus Bulls. Individually weighed to Ave 376kg LW Curfewed. The black heifers present in store condition, although are fresh and fit considering their current dry grazing conditions. They support a good medium frame in lighter condition that will go forward shown an improvement of feed. An I deal to calve down in the coming months and trade on. 4 heifers should be noted to be older than 20 months being late 21 drops The doing ability of the Watervalley cattle is certainly prevalent in these cattle, showing their usual characteristics, they're known for being versatility, fertility and doing ability and will perform well for those buyers looking to add value to their purchases.
