Temperament	Yards	Crush	Paddock
	Quiet: 95 head	Quiet: 93 head Slightly Stirry: 2 head	Temperament not assessed in Paddock

Steers have obviously been very well weaned as they were a pleasure to handle in all areas of the yards. Only two steers did resent being in the crush but did settle once back with the mob.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes
Assessor Comments	Buyers a line of yearling steers that are EU ACCREDITED and ORGANIC CERTIFIED. These had a walk of approx. 6kms to the yards the day prior to assessment and had an overnight wet curfew but definitely no hay. I would expect these steers would suit to background up to heavier domestic or export feeder entry weights off oats. They have had no grain or antibiotics at any stage and a declaration is available to make them PCAS ELIGIBLE if buyers wished to take them to heavier grassfed trade slaughter specs. They could also be grown out to heavy export organic bullocks and would fly ahead out in the channel country on winter herbages, they carry no excessive condition so I would expect good compensatory weight gains on these. Vendor has elected to scan and transfer tags due to being an EU producer for peace of mind. Note there is also a line of lighter heifers in the sale and all up both lots would fit on a 4.5 deck trucking unit.
