Weaner steers moved fairly quietly through yards provided it was done at a slow pace. Under pressure they behaved like a typical weaner with a tendency to move quickly from a few ring leaders, especially if they became isolated from the main mob. Handled reasonably well through the force and race but did resent being up close and personal on the scales in the crush. These are expected to settle further whilst being fed in the yards.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Horses
Assessor Comments	Buyers, presented is a great opportunity to purchase a 1 deck line of good quality, freshly weaned mainly flatback crossbred steers. Most of the steers appear to be flatback type however there are some steers with some Droughtmaster content and consequently a slight crest and longer ear. These steers would be ideal to put into a fresh paddock or on crop. They are nice soft steers and show plenty of bone, depth of barrel and muscling. Given the opportunity these steers would grow into the ideal item for entry weight to the feedlot for a domestic spec or to carry through to heavier export feeder entry weights or right through to bullocks. One steer was noted to have slightly more dominant male characteristics most likely a result of being castrated at a slightly older age, however that being said history would suggest these characteristics are likely to soften as he grows out. Please note there is also a 2-deck line of lighter steers also in the sale to fill a B-Double.
