	Stirry: 2 head		
	Cows worked well through yards with a few becoming agitated in the crush but settled quickly when returned to the mob , as with all Northern cows good stockmanship needs to be used when placing cows in confined areas		
Assessor Comments	Buyers a good opportunity to secure a 3 deck line of Good Quality PTIC crossbred Cows , Mostly young to medium aged (with the lighter weights being second calf hefs)all in a tight 5-7 month pregnancy window. These Cows have shown their resilience and fertility by raring a 260kg weaner through very trying conditions last year in the Mulga and getting back in calf, their weaners were removed 2 weeks ago and they have freshened up considerably since and will continue to do so on good feed. The majority of cows in this mob show the quality and fertility to be an asset to most breeding herds and have the added bonus of being in calf to Good Quality black bulls. Please note 2 cows with old blight scarring in 1 eye and a few have old fly rub marks. Cows form part of a total mob of 186 being drafted on a run out the gate basis into 3 X 3 deck lots
