	Docile: 1 head Quiet: 6 head Slightly Stirry: 1 head Females flowed easily through the yards. Slightly agitated when put in a confined space.	Quiet: 6 head Slightly Stirry: 2 head	Temperament not assessed in Paddock
Handled With	Bikes		
Assessor Comments	8 ANGUS PTIC BREEDERS that have been tested in calf as under 4months as of 20th March 2024. Females have been consistently control joined and culled on fertility. Heifer calves were weaned off the breeders on the same day as the assessment with steer portion being weaned on the 10th June. It is a testament to the females to be returned in calf after very harsh seasonal conditions in 2023 and having weaned calves that have averaged 300kg. One cow has a blue eye but not detrimental and a couple of the cows have small rub marks on the neck or belly. Cows are presenting in strong store condition and have sound full mouths. Cows would be an ideal trade article or low cost investment to increase numbers with a couple of breeding years left in the females with the right management. Vendor also has 52 PTIC Angus Cows out of the same mob preg tested 4months plus in calf available in a separate lot. Joined to Santa bulls.		
Assessor	Sarah Packer (Level 1 Accredited) Phone: 0400 267 315		
Delivery Period	10/06/2024 to 14/06/2024 (5 days)
