|                       | Cows are very well handled and worked well through home yards while being drafted by experienced cattleman. Cows drafted well when worked quietly with little pressure being applied. All cows could be blocked apart from 2. Cows flowed good through race during the assessment process. When confined a large % of cows became unsettled, cows were preg tested at the time of assessment though. Once released and no pressure was applied all cows settled quickly.
