All cows had a calf and raised a calf in 2023 cows which didn't are culled. Cows were PTIC in calf to have joined over the first 8 weeks of the joining. Cows were initially PTIC with the intention of keeping in core herd but due to the deteriorating seasonal conditions are being offered to the market. It was noted at assessment 4 cows with old pink eye scarring deemed not detrimental. These are good quality cows to go on with, calve down and profit from. Buyers please call with any questions.
