Assessor Comments	A great line of Black F1 2nd Calvers bred from top 10% of Index AI Wirruna Sires, joined up to LBW Rennylea Angus bulls. These cattle were very quiet to handle and would grow into great cows, with all the traits of the Friesan, with the added hybrid vigor. Outstanding Angus1st calves weaned in January. Cows are in strong store condition, having put everything into their calves. Based on vet scanning and drafting cows are 29-34 weeks in calf and commence calving end of June for 5 weeks
