Handled With	Steers generally worked well through the yards, there was a percentage of steers that got agitated in the crush due to being needed but settled quickly once back in the mob. Aerial (Helicopters, gyro's and planes) , Bikes , Dogs		
Assessor Comments	Buyers please see a very good quality line of steers that would be ideal to feed for either domestic or export markets or finish on oats. These steers present in strong store condition due to a dry second half of the season the buyer should expect good compensatory gains. All genuine No.3 steers that come with a renown reputation of feedlot performance. These steers did show signs of having lice but have been treated with Cydectin should be clear of this by delivery. A percentage of steers did have some horn regrowth.
