Health Treatments

Drenched	12/06/2024	mectec	
Vaccinated	07/01/2024	7in1	First Dose
Vaccinated	12/06/2024	5in1	First Dose
Vaccinated	12/06/2024	Bovilis MH + IBR	First Dose

Temperament

Yards	Crush	Paddock
Quiet: 18 head Slightly Stirry: 4 head	Quiet: 10 head Slightly Stirry: 9 head Stirry: 3 head	Temperament not assessed in Paddock

Steers behaved like normal freshly weaned calves, approx half the mob showed hesitation when going up the race and through the crush whilst the other half did so calmly. There were 3 head that became stired up while in the crush, but quickly calmed down once returned with the others.

Handled With	Bikes , Dogs , On foot , Vehicles
Assessor Comments	22 steers presenting in forward store condition have had a great start to life. These steers have been weaned at the time of assessment and will remain in the yards being fed quality cereal hay and cotton seed. There has been a weight gain of "0 kg/day" put on these cattle due to the fact that they are being yard weaned. given that they are being fed high quality hay and cotton seed and that many of the animals have been self weaned, in the assessors opinion the weight will be maintained or slightly increased. These cattle will be ideally suited to a feedlot program or continue on oats and grow into heavy feeders or a domestic trade/ export article.
Assessor	**Henry Pitman (Level 3 Accredited)** Phone: 0467 978 899
Delivery Period	14/06/2024 to 21/06/2024 (8 days)
