Assessor Comments: A very astute line of EU Angus weaner steers that are bred in the purple that are 100 % Glenavon angus blood. If your chasing EU feeder steers that are from a from reputable breeder that is backed by quality genetics these steers wont let you down. Steers are well grown at 9 - 11 months with a top full weight 439 kg off pasture. Steers were weighed to tight bracket of 380 to 439 full to avg 402.2 kgs at assessment. A focus and emphasis is put on IMF, 600 day weight in the EBV traits when selecting bulls for the Glendon herd that then put over a classy line of large frame Angus cows. Steers are thick and stand on good bone that would handle a long fed program. Being EU, Grass fed eligible and Antibiotic free there is not a domestic or export end market that steers will not fit, Prefect weight for the feedlot or quality steers to finish on grass. A quality line of steers not to be missed.
