Handled With	Weaners were a pleasure to handle working well through the yard and race with only small % becoming slightly agitated in crush but settled quickly once being returned to mob ,heifers have had an extensive weaning programme in yards and tailing out in pdk , It isa credit to vendors the temperament of these girls and the way they handled being first time back in yards since weaning.

Assessor Comments	Buyers a great opportunity to secure VGQ No 4 EU weaned heifers. These heifers are the younger draft of the Biddenham weaners and are out of Large framed Xbred Cows by Moongool Simmental , Gidyea Brangus and Ultrablack and Valeravale Droughtmaster sires, they mostly show great length, bone and softness with tremendous weight for age and would be an asset to most breeder herd's. Alternatively they would be Ideal to take through to Lucrative HQB EU Slaughter weights or Heavy EU feeders. Rarely do heifers of this quality come on the market as weaners, all the hard work has been done with extensive yard weaning and educating in paddock so they are ready to power ahead on grass or oats . Please note 2 heifers show some very small weaner horn due to dehorning miss at branding and 2 having slight blight scarring in one eye , neither considered detrimental . Vendor has 4 decks of brothers in the same sale.
