Assessor Comments	Gilliland Livestock Marketing offers a lovely line of 27 Brahman Droughtmaster cross heifers. This run of heifers present in store condition after being weaned and grazed on very light sandy forest country at Tamborine. With a large frame these heifers were weighed to average 199 kg at assessment. As can be seen in the videos and photos these heifers are predominantly softer types of Brahman Droughtmaster heifers that would be ideal breeder heifers in the future. Overall, very even line of store heifers that will excel in a very short time frame if given the opportunity on better feed conditions.
